In the spring of 2005, acclaimed environmental photographer James Balog headed to the Arctic on a tricky assignment for *National Geographic*: to capture images to help tell the story of the Earth's changing climate. Even with a scientific upbringing, Balog had been a sceptic about climate change. But that first trip north opened his eyes to the biggest story in human history and sparked a challenge within him that would put his career and his very well-being at risk.

Chasing Ice is the story of one man's mission to change the tide of history by gathering undeniable evidence of our changing planet.

“Ciné-ONU Vienna” is part of a Europe-wide initiative of regular film screenings of UN related topics followed by podium discussions with invited guests who were part of the film making process or are experts in the topic covered by the film. The United Nations Information Service (UNIS) Vienna is honoured to have “Ciné-ONU Vienna” partner with *this human world (THW)* film festival and *Topkino* for the regular film screenings in Vienna.
