We will share the link to the film on the night.

After watching the film, join us at 19:45 CET for the panel discussion. The panel discussion will finish at 20:30 CET.

SYNOPSIS:

IT ONLY TAKES A SPARK: FROM DEVIL'S BREATH tells the unlikely story of two remarkable narratives that come crashing together; the extraordinary, inspiring community of survivors of the deadly 2017 wildfires in Portugal, fighting to ensure what they've lived through can never happen again; and a revolutionary, world-changing scientific discovery which could help protect us all from the climate emergency.

Please note that the United Nations does not necessarily endorse the views and opinions expressed in films screened at Ciné-ONU events.
